

Product Name : 9K TITANIUM BROWN - (PU Rubber)

Detail :

The differences between Rubber and Polyurethane are heat and chemical resistance properties. Rubber soles give greater resistance. Shoes with rubber soles are therefore the correct choice for areas of application in which these kinds of hazards may arise. Vulcanized Nitrile Rubber can withstand temperature of 300° C. PU+Nitrile Rubber shoes provide comfort to the wearer. Polyurethane midsole gives cushioning effect and helps in energy absorption thereby increasing the work efficiency of the wearer. Also, PU+Nitrile Rubber shoes are light

Description :

| NAME | 9K TITANIUM (BROWN) |
|--------------------------------|---|
| UPPER MATERIAL | GENUINE LEATHER 1.8-2.0 MM THICKNESS & WATER RESISTANT |
| QUARTER LINING | Sweat absorbent black mesh having excellent abrasion |
| | resistance. |
| TOE CAP | Polycarbonate Toe Cap EN 12568 200J with Comfort Strip. |
| | Protect against |
| compression injury up to 15 KN | l. |
| | |

| INSOLE | Anti-Static Penetration resistant Kevlar. Tested for 1100 |
|---------|---|
| | Newton. |
| MIDSOLE | Polyurethane (PU) Black colour serving as a Cushion for |
| | comfort. |

| | Nitrile Rubber having excellent abrasion resistance and |
|-----------------------------|---|
| OUTSOLE | heat resistant up to 300? |
| С. | |
| INSOCKS | 6 mm soft PU moulded Insocks. |
| SIZE | UK 04 - UK 14 |
| PROPERTIES | Anti-static, Anti penetration, ANTI SKID, OIL & ACID |
| PROPERTIES | RESISTANT, SHOCK ABSORBER |
| AND HEAT RESISTANT UP TO 30 | 00? C |
| | |
